

IN FIELD HYDRAULIC HOSE REPAIR CLAMPS

Our hydraulic hose repair clamp is designed to reduce downtime from hours or even days to just minutes. The clamp is made from 316 stainless steel is reusable and should be used as a temporary measure while waiting on a new hose. Its quick and simple to use. For small holes, simply fit the clamp over the hole or for more robust repair, cut the hose, insert the barb and fit the clamp. Its a one-time investment, that will save time and money for years to come.

Our Hydraulic hose repair clamp kit is ideal for farmers and contractors using a variety of different size hoses. Use as a patch for a quick repair to get back to the workshop or move machinery to a more convenient location, or as a joiner to keep working until you can replace your hose. Kit includes repair clamps, joining barbs and bolts for 1/4", 3/8", 1/2", 3/4" & 1" hose.

995\$ plus tax for the reusable kit
